

Travis M. Johnson

New York, New York • (347) 616-9030 • travisjohnson5261@gmail.com • tjbest.dev

EDUCATION

The Borough of Manhattan Community College, Cloud Computing Training Program, New York, NY July 2026

- Completed 290+ hours of training for AWS and CompTIA certifications.
- Build hands-on experience through cloud labs (e.g., deploying resources, configuring services, basic architecture tasks).

Brooklyn College, Bachelor of Business Administration, New York, NY

Major: Business Administration, GPA: 3.2

PROFESSIONAL EXPERIENCE

A&J Luxury Event Planning, Event Coordinator, New York, NY Jan 2023 – Apr 2026

- Coordinated budgets, schedules, and deliverables for 50+ projects valued at \$5K–\$50K, ensuring on-time and on-budget completion.
- Negotiated vendor contracts and managed billing processes, contributing to \$100K+ in revenue.
- Directed communication and logistics among 30+ vendors, clients, and subcontractors, improving workflow efficiency and stakeholder satisfaction.

New York Decks, Supply Chain and Logistics Intern, New York, NY Sept 2023 – Dec 2023

- Supported construction site operations by streamlining material tracking and documentation across multiple projects, reducing costs by 8%.
- Improved scheduling and financial reporting accuracy through updated inventory and procurement systems (Fishbowl, Excel).

Brooklyn Navy Yard Development Corporation, Project Coordinator, New York, NY June 2022 – June 2023

- Supported construction and tenant improvement projects by developing and maintaining rent schedules for 100+ tenants in a multi-use property.
- Assisted project managers with financial reporting, budget monitoring, and compliance with city agency requirements.
- Analyzed 100+ vendor RFPs and prepared cost comparison reports, helping select qualified contractors and improve project efficiency.

PROJECTS

[Serverless Cloud Portfolio & Capability Matrix](#) | *AWS S3, CloudFront, Route 53, ACM, Git, HTML/CSS/JS*

- Architected and deployed a highly available, serverless portfolio website using Amazon S3 Static Website Hosting.
- Provisioned a global Content Delivery Network (CDN) via CloudFront to reduce latency and cache static assets at edge locations.
- Implemented HTTPS encryption globally by generating and attaching SSL/TLS certificates via AWS Certificate Manager (ACM).
- Configured custom DNS routing and managed domain name using AWS Route 53.
- Developed a responsive frontend UI using Vanilla JavaScript and CSS Flexbox to dynamically render project data and API integrations without heavy framework overhead.

[Automated Job Search & AI Evaluation Pipeline](#) | *n8n, SerpApi, LangChain, Claude, Google Sheets, JavaScript*

- Engineered an automated n8n workflow integrating SerpApi to scrape targeted project management and operations roles from Google Jobs on a weekly schedule.
- Developed a LangChain AI agent using Claude to parse job descriptions and score them against a custom rubric, evaluating the alignment with professional experience.
- Automated media production by chaining OpenAI text to speech API calls with local FFmpeg commands to render video and audio, culminating in an automated upload to YouTube via their API.

[Autonomous AI Video News Broadcaster](#) | *n8n, RSS, LangChain, Google Gemini, Claude, OpenAI API, FFmpeg, JavaScript*

- Architected an end-to-end data pipeline in n8n that aggregates multi-category RSS feeds and curates top daily stories using custom JavaScript logic.
- Orchestrated multiple LLMs (Google Gemini and Anthropic) to synthesize raw data into cohesive, 1,600 word broadcast scripts.
- Automated the extraction of high-fit opportunities, customized application strategies, and direct links into a centralized Google Sheets database to streamline the job hunt process.

[YouTube Viral Content Strategy Analyzer](#) | *n8n, YouTube Data API, LangChain, Google Gemini, Claude, Google Sheets, JavaScript*

- Built a data scraping utility using the YouTube Data API v3 to pull performance metrics from hundreds of videos and identify high-performing outliers.
- Configured logic gates to isolate videos where view counts heavily exceeded subscriber counts, filtering for specific viral parameters.
- Utilized an AI agent to analyze the scraped content and automatically generate adapted script concepts, logging the actionable strategies into Google Sheets.

TECHNICAL SKILLS AND CERTIFICATIONS

Platform & Tools: AWS Services (S3, EC2, IAM, VPC), n8n, Antigravity, Docker

Infrastructure & OS: Linux (Command Line), Terraform (Learning)

Programming Languages: Python (Learning), JSON Processing, REST APIs

Certifications: AWS Certified Solutions Architect Associate (In Progress), [AWS Certified Cloud Practitioner](#)
